Default Argument Breaking Change (DABC)

```
clf = SVC() # Wait... NOOOOO!

Investigate the occurrence of DABCs in Scikit-Learn

Library

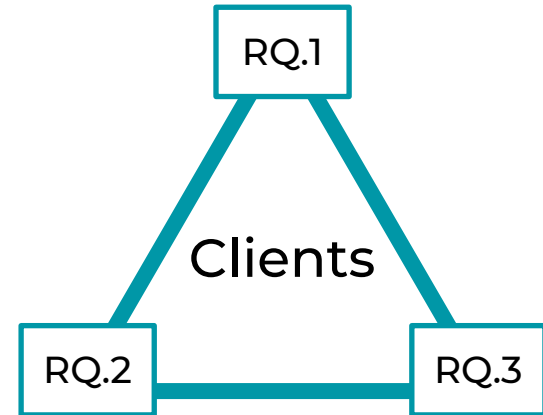

RQ.1: What are the Most Common DABCs?

RQ.2: In which version the DABCs were introduced?

RQ.3: In which modules the DABCs were introduced?

Clients

RQ.4: How clients are vulnerable to DABCs?

Library

```
class SVC(BaseSVC):
```

```
    """C-Support Vector Classification.
```

```
    ...
```

```
    Parameters
```

```
    -----
```

```
    ...
```

```
    gamma : {'scale', 'auto'} or float, default='scale'
```

```
        Kernel coefficient for 'rbf', 'poly' and 'sigmoid'.
```

- if ``gamma='scale'`` (default) is passed then it uses $1 / (n_features * X.var())$ as value of gamma,
- if 'auto', uses $1 / n_features$
- if float, must be non-negative.

```
    .. versionchanged:: 0.22

1. Cloned scikit-learn repository
2. Checked-out version 1.1.2 (latest public release)
3. Looked for `/\.\.versionchanged:: .+\/` regex
4. Manually removed unrelated ones

Library

- **[RQ.1]** 77 DABCs in total.
- **[RQ.1]** 56 DABCs in class constructors.
- **[RQ.2]** DABCs in all majors between 0.19 and 1.1.
- **[RQ.3]** Model Training and Evaluation gather 79% of all DABCs

Clients

● Scikit-Learn DABCs signature (Library)

● Grovov et al. "A large-scale comparison of Python code in Jupyter notebooks and scripts." MSR 2022.

Clients

- 10 DABCs concentrate 250K (79%) DABC calls.
- 67K (35%) clients are vulnerable.
- 312K (98%) calls deal with Model Training and Evaluation.

SVC(gamma) 22K calls

To Takeaway

- **[Researchers]** DABCs are a reality.
- **[Maintainers]** Default Arguments updates should follow strict version guidelines.
- **[Clients]** Avoid relying on default values.
